

FIRE PREVENTION

IN A MATTER OF
SECONDS

The Fireball Extinguisher activates automatically within 3–7 seconds of contact with open flames, covering 9–12m² for fast, effective fire control.

This innovative fire extinguisher is ideal for high-risk areas such as **electrical distribution boards, solar PV systems, battery enclosures, server rooms, and other enclosed or confined spaces, including campers.**

**NOT SUITABLE FOR CLASS D (COMBUSTIBLE METAL) FIRES,
INCLUDING LITHIUM BATTERY FIRES.**
